

# mArtketplace

One whole website, created by me, Greg Martin.

# Problem

At the moment there are plenty of websites out there (Society6 and RedBubble for example) that allow for purchase of an artwork, but it doesn't allow for users to post their own artwork, unless they themselves have created it.

# Problem, solved

Without this mArtketplace application, there's no centralised online presence for people to sell the prints that they own, as well as in the same swift visit, buy another persons print that they are selling.

The site.

**Thank you.**
